

REPORT

On July 17 to 21, 2023, 200 plant saplings were planted inside our campus. The saplings were provided by the Social Forestry Department, Govt. of Kerala and included a variety of trees, such as Mango, Jackfruit, Rambutan, Elanji, Njaval, Nelli, Chamba etc. The planting was carried out by a team of volunteers from the Forestry Club and Nature Club of the Institution. Students from all the batches participated in the event.

The planting took place in different locations in the campus. The saplings were planted in well-drained soil and watered thoroughly. The volunteers also placed mulch around the saplings to help retain moisture.

The planting of these saplings is a significant step towards improving the green space on campus. The trees will provide shade, reduce air pollution, and attract wildlife. They will also help to improve the overall aesthetic of the campus.

The volunteers and staff who participated in the planting were enthusiastic about the project. They expressed their hope that the trees will thrive and provide many years of enjoyment to the campus community. Each student's name, who has planted the tree, was also displayed with the plants.
