

Report on Candle Making Training at Senior Secondary Government School, Bichpuri by Unnat Bharat Abhiyaan, NIIT University, Neemrana

Date: August 24, 2024

As part of the Unnat Bharat Abhiyaan initiative, a visit was conducted to the Senior Secondary Government School in Bichpuri on August 17th, 2024. The primary objective of this visit was to conduct a candle-making project aimed at enhancing the skill development of the students.

The visit was met with great enthusiasm from the students, who were not only eager to learn but also excited about the possibilities the project opened for them. As the session progressed, the students began discussing entrepreneurial ideas, with some expressing their plans to sell the candles they made at a price of 15 rupees each. In a heartwarming moment, one boy offered to handle the delivery of the candles since he owns a bike, showing their eagerness to take initiative and work together.

This interaction was a clear indication of the project's success in sparking creativity and entrepreneurial thinking among the students. The visit has laid a strong foundation for future skill development initiatives, and there are plans to continue fostering this spirit of learning and enterprise in the school.
