

Rural development through 3Cs

In India, majority of the rural development schemes, policies and activities planned and executed through federal system of government including three layers of the governance. From planning to execution various gaps take place. The proposed plan intends to fill those gaps for effective use of financial and other resources.

- **Community** includes, government schools, farmers, MSMEs, other households and home-based small business enterprises.
- **Campus** refers residential higher education campus,
- **Company** includes sizeable company which have sufficient CSR funds to invest.

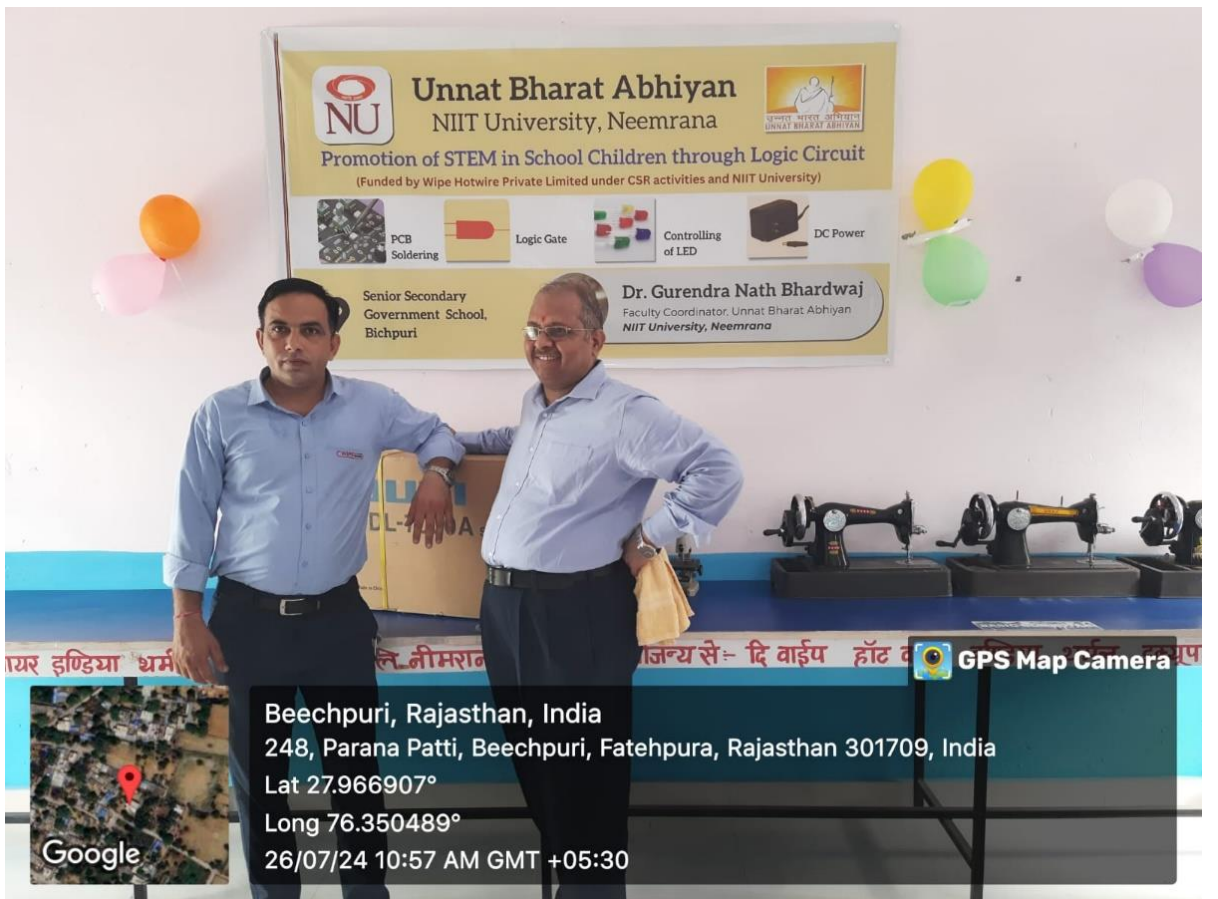

The project intends to create employability among the school students and skill centre can train other villagers also to get the job or start their own business. While working on project NU students and faculty will get exposure of rural life and students of urban centres will be sensitized about difficulties faced by rural population.

Following projects are running at Bichpuri Senior Secondary Government School through Skill Development Centre sponsored by Wipe Hot Wire Private Limited, Neemrana.

1. Candle Making
2. LED and circuit-based projects
3. Stitching training on electronic sewing machine

On July 26, 2024 the Skilled Development Centre has been inaugurated by Mr. L. N. Mathur, Managing Director, The Wipe Hotwire Private Limited.

The Team Unnat Bharat Abhiyan NIIT University, Neemrana has been working since last years to engage students at Government Senior Secondary School, Bichpuri to develop their skills and creating employability. Now, in academic year 2024-25, the target is trained 3 batches of 10 students each year. The team is planning to connect these trained students with nearby MSMEs to provide job to some of the trained students.

Team of Unnat Bharat Abhiyan of NIIT University, Neemrana will

- Identify the potential students for training
- Develop the registration form for trainees
- Develop training material, guidelines, timetable and schedule for the semester.
- Create awareness among school students and other villages people about hygiene, various government schemes, digital and financial literacy etc.
