- Population of this village Approx. 4000

Major Problems in Village

- * Water drainage system
- * Water resource
- * Rain water harvesting
- * Digital education

Solution of Water drainage system

- * **Proper Planning and Design:** Ensure drainage systems are well-designed based on land slope, rainfall data, and urban layout to allow efficient water flow.
- * **Regular Cleaning and Maintenance:** Clear drains, gutters, and storm water systems regularly to prevent blockages caused by debris, plastic, and sediment
- * **Upgrade Old Infrastructure:** Replace or repair outdated or undersized drainage systems that can't handle current water volumes.

Solution for Improvement in Digital Education

- * **Improve Internet Connectivity:** Expand broadband or mobile internet networks to ensure stable and affordable access in rural regions.
- * **Provide Digital Devices:** Supply students and teachers with affordable or government-supported devices like tablets, laptops, or smartphones.
- * **Train Teachers:** Conduct regular digital literacy and teaching methodology training for rural educators to use technology effectively in classrooms.
