The kids were not accessible to many new things and they were so excited to talk with us . There were approximately 300 students from class 1 to 5 . We interacted with all the kids there and entertained them with a little bit of knowledge about what education is and it's importance. We interacted with the kids and encouraged them to stand before all and talk. We also asked a few general questions to the students and also enquired about the system they followed there. Lot of students came up with Telling rhymes and shared a lot out of excitement. This was a total great

experience meeting people in the rural areas and spreading the knowledge about law gave us satisfaction.
