8	Project Outcomes	Effective solid waste management, organic manure preparation at low cost, micro entrepreneurship for the village people Improved quality of education in Government schools

9	Description of Project in 150 words	<p>1)Micro Composting Center: Around 450 tonnes/day of solid waste is produced by Thiruvallur district of which 90% waste is not treated and are dumped as landfills which affects the environment. Hence the idea of on-site composting is a simple and affordable method of handling solid waste within the living area and generating agriculture manure is suggested.</p> <p>4 bin micro composting centers will be fabricated with stirrers and tilters for dumping biodegradable waste. At the outset, segregation at source is suggested and the waste will be collected. The collected waste is mixed with EM solution which will get converted to biomanure within a period of 30 days.</p> <p>2)Participation in school education: Our faculty members and students participate in school education with the following objectives: To enhance the quality of education in Government schools; To stimulate interest to learning in the schools children through activities, games, videos etc. and to increase the students' enrolments in government schools.</p>
